EDUCATION

Center for Research in Computer Vision, University of Central Florida
PhD in Computer Science — *August 2018–Present*
MS in Computer Science — *December 2022*
Research areas: Semi-Supervised Learning, Few-Shot Learning, Self-Supervised Learning

Bangladesh University of Engineering and Technology
BSc in Electrical and Electronic Engineering — *March 2016*

SELECTED PUBLICATIONS

- **Mamshad Nayeem Rizve**, Gaurav Mittal, Ye Yu, Matthew Hall, Sandra Sajeev, Mubarak Shah, Mei Chen; **PivoTAL: Prior-Driven Supervision for Weakly-Supervised Temporal Action Localization**; Conference on Computer Vision and Pattern Recognition **(CVPR)** 2023
- **Mamshad Nayeem Rizve**, Navid Kardan, Mubarak Shah; **Towards Realistic Semi-Supervised Learning**; European Conference on Computer Vision **(ECCV)** 2022 (Oral Presentation)
- **Mamshad Nayeem Rizve**, Navid Kardan, Salman Khan, Fahad Shahbaz Khan, Mubarak Shah; **OpenLDN: Learning to Discover Novel Classes for Open-World Semi-Supervised Learning**; European Conference on Computer Vision **(ECCV)** 2022
- **Mamshad Nayeem Rizve**, Salman Khan, Fahad Shahbaz Khan, Mubarak Shah; **Exploring Complementary Strengths of Invariant and Equivariant Representations for Few-Shot Learning**; Conference on Computer Vision and Pattern Recognition **(CVPR)** 2021

EXPERIENCE

Graduate Research Assistant, Center for Research in Computer Vision — *August 2018–Present*

- Worked on video activity detection. Performed localization and classification of actions from untrimmed video sequences on a multi-label and multi-class dataset. Achieved *first* place in ActEV SDL 2020 challenge (ActivityNet Challange, CVPR-2020) and *second* position in TRECVid 2019 challenge.
- Worked on incorporating visual odometry based relative motion for improving cross-view video geo-localization.
- Worked on recognition of camera trapped animals from a highly imbalanced dataset.

Research Intern, Microsoft *May 2022–July 2022*

- Worked on weakly supervised temporal action localization (WTAL) and proposed the first method to approach WTAL from a *l*ocalization-by-localization perspective by generating pseudo-action snippets.
- Proposed to exploit the underlying spatio-temporal regularities in videos in the form of action-specific scene prior, action snippet generation prior, and learnable Gaussian prior to complement the video-level weak supervision.
- Obtained significant improvement over previous state-of-the-art on multiple benchmark datasets.

Software Engineering Intern, Aurora Innovation *May 2021–August 2021*

- Worked on emergency-vehicle detection based on siren audio data.
- Created an emergency-vehicle siren dataset and implemented the baseline and state-of-the-art audio classification methods for emergency-vehicle detection.
- Improved over the state-of-the-art methods by incorporating self-supervision and knowledge distillation.

System Engineer, Grameenphone Limited *September 2016–July 2018*

- Supervised and monitored a transmission network consisting of more than 15000 nodes.
- Developed an analytical tool to identify microwave links with line of sight problem based on received signal level.
- Member of one of the finalist teams of Telenor Group's global entrepreneurship program.

SELECTED ACADEMIC PROJECTS

- **Semantic Segmentation**
  - Proposed Patch-Dice loss to address severe intra-class scale variance.
  - Worked on the MS COCO dataset and implemented *DeepLabv3+*.
- **Unsupervised Keypoint Detection**
  - Implemented *Unsupervised Learning of Object Landmarks through Conditional Image Generation*.
  - Incorporated a feature denoising block to improve the performance.
- **Video Object Segmentation**
  - Incorporated self-attention blocks, feature pyramid network and atrous convolution to improve VOS.
  - Implemented the method proposed in *YouTube-VOS: Sequence-to-Sequence Video Object Segmentation*.
- **Person Re-Identification**
  - Incorporated CycleGAN based camera style transfer to learn camera invariant features.
  - Proposed a segmentation mask guided identity loss to retain ID specific features in style transferred images.

SKILLS

Programming	Python, MATLAB, C/C++, Assembly, SQL
Libraries	Deep learning (Pytorch, Keras, Tensorflow), OpenCV

HONORS AND AWARDS

- Best Paper Award at ICPR –2020
- UCF ORC Doctoral Fellowship – 2018
- BUET Dean's List – 2012, 2015
- Education Board Scholarship – 2008, 2010
